A mechanical method for the determination of absorption in bread doughs. C. C. Fifield.....	547
A. A. C. C. basic cake formula. L. H. Bailey.....	627
Acidity	
Development of, in stored flours. A. Schulerud	129
Increase of, and improvement of quality in bread made from sprouted wheat flour. Natalie Kozmin	420
Acids, Use of, to improve quality of bread made from sprouted wheat flour. Natalie Kozmin	429
Address of the President. L. D. Whiting	370
Age of cake, Change in compressibility and tensile strength with. Washington Platt and Philip D. Kratz	87
Alexander, G. L. The results of bleaching Michigan soft winter wheat cake flours by the Brabender electric bleaching apparatus	623
Ammonium phosphate. Effect of, on loaf volume. R. K. Larmour and S. F. Brockington	599
Analysis of gliadin. W. B. Sinclair and R. A. Gortner	177
Analysis of sitosterol esters in wheat flour oil. Marvin A. Spielman	240, 241
Anti-oxygens, as related to the development of rancidity in fats. H. O. Trie- bold, R. E. Webb, and W. J. Rudy	272
Antirachitic potency of soda cracker shortening as influenced by fermentation and baking. J. W. Read and C. H. Bailey	124
A. O. A. C. method for determining flour acidity, Value of. A. Schulerud ..	129
Apparatus for	
biological determination of sugars in starch degradation products. A. Schultz and G. W. Kirby	150
bleaching cake flours, Brabender electric. G. L. Alexander	623
delivery of solutions in experimental baking tests. Philip Talbott and Ray Weaver	368
determining carotinoid pigment of wheat flour. C. G. Ferrari	277, 280
determining gas production in dough fermentation. E. Elion	247
determining tenderness in pastries. Minna C. Denton, Beulah Gordon, and Ruth Sperry	157
irradiation tests on crackers and shortenings. J. W. Read and C. H. Bailey	107
measuring color of flour and bread. J. C. Baker, H. K. Parker, and F. B. Freese	438
measuring compressibility of sponge cake. Washington Platt and Philip D. Kratz	81
measuring tensile strength of sponge cake. Washington Platt and Philip D. Kratz	82
subsampling cake for measurement of toughness (tensile strength). Washington Platt and Philip D. Kratz	83
punching and molding experimental doughs, S-rolls. W. F. Geddes, and L. D. Sibbitt	561
biological determination of sugars in starch degradation products. A. Schultz and G. W. Kirby	150
viscosity tests on soft wheat flour. E. G. Bayfield	494
wheat meal fermentation time test for wheat quality. G. H. Cutler and W. W. Worzella	253, 254
wheat meal fermentation time test. H. K. Wilson, M. C. Markley, and C. H. Bailey	619
Aqueous culture media as means of studying effect of nitrogenous fertilizers on bread-making quality of wheat. W. F. Gericke	347
Ash, calcium, and phosphorus content in corn-meal. A. D. Holmes and Francis Tripp	319

whole wheat meal	292
Vitamin B and G content of wheat germ, rice polishings, cottonseed flour, and the residue from fermented rye grains. H. E. Munsell and G. M. DeVaney	287
Walters, H. G. Tests for biscuits and self-rising flours	635
Water absorption of flour	
and wheat-meal fermentation time test. G. H. Cutler and W. W. Worzella	255
commercially <i>vs.</i> experimentally milled. M. C. Markley and C. H. Bailey	521
for soft wheat flours with the A. A. C. C. basic baking procedure. E. G. Bayfield and V. Shiple	143,
of whole wheat flours. R. T. Bohn and F. D. Machon	533
Super-centrifuge method for. C. O. Swanson and E. B. Working	21
Water-soluble extract in	
bread from sprouted wheat flour. Natalie Kozmin	426
doughs made from sprouted wheat flour. Natalie Kozmin	426
Nitrogenous, in bread from sprouted wheat flour. Natalie Kozmin	426
Weaver, Ray, and Philip Talbott	
An apparatus for the convenient and accurate delivery of solutions used in experimental baking tests	367
and D. A. Coleman	
Variability in experimental baking. I. Effect of mechanical mixing device, time of dividing doughs, and quantity of dough mixed on loaf characteristics	612
Variance in experimental baking. II. Yeast variability	615
Webb, R. E., W. J. Rudy, and H. O. Triebold. A chemical study of rancidity. III. Some recent developments in the study of oxidative rancidity of special interest to the cereal industry	263
Wheat	
Influence of different nitrogenous salts upon protein content and quality of. W. F. Gericke	347
Inorganic constituents of. B. Sullivan	505
Protein content and wheat-meal fermentation time test. G. H. Cutler and W. W. Worzella	255
strength, Influence of experimental milling in the evaluation of. W. F. Geddes, H. N. Bergsteinnson, and S. T. Hadley	555
Wheat flour oil, Sitosterol esters in. M. A. Spielman	240
Wheat germ as a source of vitamins B and G. H. K. Munsell and G. M. DeVaney	290
Wheat-meal fermentation time test. H. K. Wilson, M. C. Markley, and C. H. Bailey	619
Wheat-meal fermentation time test of quality in wheat as adapted for small plant breeding samples. G. H. Cutler and W. W. Worzella	250

	Page
Wheat starch	
Hydration capacity of, as influenced by temperature. R. A. Gortner	301, 304
Hydration capacity of, from different varieties. R. A. Gortner	301
Wheat, Whole, as a source of vitamins B and G. H. K. Munsell and G. M. DeVaney	292
Whiting, L. D. Address of the President	370
Whiteside, A. G. O., R. K. Larmour, and W. F. Geddes. Comparison of various baking formulas used in testing wheat quality for the plant breeder	601
Wise, M., and C. F. Davis	
A five-year summary of the monthly check sample reports of the Pioneer Section of the A. A. C. C.	203
Report of the subcommittee on selenium as a Kjeldahl catalyst in the cereal laboratory	488
Whole wheat flour, Determination of diastatic activity of. M. J. Blish and R. M. Sandstedt	201
Wilson, H. K., M. C. Markley, and C. H. Bailey. The wheat-meal fermentation time test	619
Wing, M., E. G. Halliday, I. T. Noble, and M. Dean. <i>In vitro</i> digestion of the starch in long and short cooked cereals	243
Working, E. B., and C. O. Swanson. Testing the quality of flour by the recording dough mixer	1
Worzella, W. W., and G. H. Cutler. The wheat-meal fermentation time test of quality in wheat as adapted for small plant breeding samples	250
Yeast	
as a source of vitamins B and G. H. K. Munsell and G. M. DeVaney	295
variability, Effect of, in A. A. C. C. laboratory baking test. Ray Weaver, Philip Talbott, and D. A. Coleman	615
Yellow corn, Influence of the composition of, on the effectiveness of a rachitogenic ration. A. D. Holmes and Francis Tripp	313
